

Medical Centre Order management can be extremely time consuming and prone to human error from manual data entry. By introducing **StarScan**, Medical Centres can easily control inventory supply and make sure that the right supplies are ordered, in the right quantities and delivered on time.

Now is the time for **StarScan**

StarScan On your smartphone provides more than just convenience. It allows you and your team to scan and shop in your store room. And with **StarScan** scanning technology, you can reliably scan any product from the shelf or work trolley.

Why does **StarScan** work so well?

STEP 1

Pick up product

STEP 2

Scan it

STEP 3

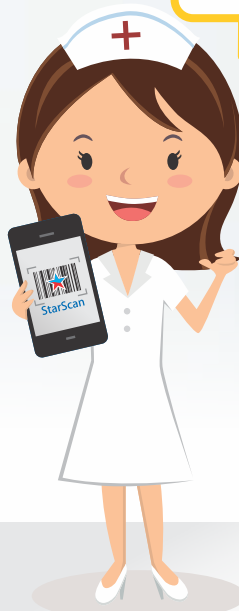

Place order

It's that simple!

And it means nurses can focus less on the stock management and more on patient contact.

StarScan on phone means I can order anytime.

Getting started with **Star Medical** is easy.
